Kashyap Hirani

Frontend Developer | Portfolio
Ahmedabad, Gujarat, India | +91 7359187170 | hiranikashyap637@gmail.com | linkedin.com/in/kashyap-hirani-053059247

PROFESSIONAL SUMMARY

Frontend Developer with 3.5+ years of experience building responsive, scalable web applications with React.js, Next.js, Angular, JavaScript and TypeScript. Proficient in Redux and Zustand state management, REST API integration and frontend performance optimization. Hands-on experience with LLM integration and real-time SSE streaming, multi-persona role-based access control (RBAC) and offline storage with IndexedDB. Works directly with clients and guides junior developers to provide suitable solutions. First-prize winner, Brainathon 2023.

TECHNICAL SKILLS

Frameworks & Languages: React.js, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap
Libraries & State Management: Redux, Zustand, React Query, Axios
API & AI Integration: RESTful APIs, LLM Integration, Server-Sent Events (SSE) Streaming
Frontend Development: React Hooks, Reusable Components, Component-Based Architecture, Single-Page Applications (SPA), Responsive Web Design, Cross-Browser Compatibility, Performance Optimization, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Frontend Developer | Brainvire Infotech, Ahmedabad | Jan 2023 - Present

- Built dynamic, responsive web applications with React.js, Next.js and Angular, applying React Hooks, reusable components and modular architecture for scalable, maintainable interfaces.
- Integrated RESTful APIs with Axios and React Query and structured application state with Redux and Zustand.
- Engineered an AI-powered chatbot with LLM integration, streaming server-sent chunks over SSE for low-latency, real-time conversational responses.
- Implemented multi-persona role-based access control (RBAC) and IndexedDB offline storage for role-specific screens and faster data access.
- Visited clients to understand business requirements and project expectations, then collaborated with the team on suitable frontend solutions.
- Supervised junior developers by assigning tasks, tracking progress and supporting completion of project milestones.
- Applied AI tools to accelerate development and automate repetitive tasks.

PROJECTS

Pidilite (Fevicol) | React.js

- Created a responsive web application for contractor users across devices and screen sizes.
- Structured the interface with reusable components and React Hooks.
- Established multi-persona role-based access control (RBAC) for a hierarchy of contractor users, with role-specific screens, actions and data.
- Added IndexedDB offline storage to improve performance and data availability.
- Maintained application state with Redux and Zustand.
- Met the client on-site to understand their requirements and expectations, then worked with the team to implement the required features.

MPower CC 2.0 | React.js

- Architected modular, reusable components for a maintainable application structure.
- Adopted Zustand for lightweight, efficient state management.
- Handled API integration and frontend performance optimization to provide user-friendly interfaces.

Yokohama | Angular

- Developed an Angular single-page application (SPA) using components, services and dependency injection.
- Crafted responsive user interfaces for various devices and screen sizes.

EDUCATION

Bachelor of Engineering, Information Technology | Shantilal Shah Engineering College, Bhavnagar | 2019 - 2023
Higher Secondary Certificate (H.S.C.), Science | D A Vidhya Mandir, Dhandhuka | 2017 - 2019

AWARDS

First Prize, Brainathon 2023 | Brainvire Infotech - won first place in a competitive hackathon by delivering an innovative solution within a limited timeframe.
